

Camps COVID-19 Guidance 2022

Residential Camps and Sprees

Guidance context

This document contains recommended guidance for careful consideration when running an Urban Saints youth residential for summer 2022. We would encourage all teams to consider how we can remain Covid-19 responsible, ensuring best practice is established in a residential setting.

Pre-residential considerations

COVID-19 risk assessment: Any Covid-19 specific risks should be included in the main risk assessment for a residential. For example: good cleaning, hand sanitisation.

Vaccinations: We do not require anyone to have had vaccines as a prerequisite to coming on site.

Team contingency planning: We recommend that Core Teams make contingency plans for how they would respond should a team member/ team members be unable to be on site at very short notice, particularly for those in key roles. You are welcome to contact the Urban Saints 24/7 Helpline number 01582 589855 for further advice and support if the number of team members impacted means a Camp may not be able to run.

Testing: Testing is not required ahead of attending a residential, unless someone is symptomatic or has been in very close contact with someone who has tested positive for Covid-19.

Testing positive for Covid-19 before Camp: If someone due to attend a Camp tests positive for Covid-19, they should not attend that residential for 72 hours after receiving the positive result and must be symptom free before attending.

Refunds: Our refund policies can be found in the FAQ's

- Sprees: <https://www.urbansaints.org/covid-spree-faqs-2022>
- Camps: <https://www.urbansaints.org/covid-camps-faqs-2022>

Where a positive Covid test is required as evidence, a lateral flow test will suffice.

Please note, individual Camps Core Teams may choose to put in additional Covid-19 guidance for their Camp. Any additional guidance should be communicated to all those attending the Camp by the Core Team.

For consideration during the Residential

Cleaning: Hand sanitiser should be available throughout the site.

Face coverings: We do not require face coverings to be worn during Camp, but individuals should be encouraged to bring a face covering in case they attend a venue where it is required.

COVID-19 cases during the Camp:

A pack of five Covid-19 tests will be sent to each residential.

If anyone on site is clearly symptomatic of Covid-19, the individual should take a lateral flow test. If a test returns positive, arrangements should be made for the individual(s) to return home as soon as practically possible.

If someone does test positive during the residential, then consider preventative measures, for example, additional cleaning around the site.

If there is a COVID-19 outbreak (multiple cases) during the residential, the Main Leader should contact the Urban Saints on-call team via the 24/7 Helpline number 01582 589855, along with the Site Owners. Urban Saints will provide the Core Team with assistance if required.
