

Movie Reflections

Movie - Monsters Inc.

Welcome to the workplace of Monsters Incorporated, where we meet Mike and Sully, the top ranking 'scarers', who visit children at night to collect their screams to use as energy! Their fears of being touched by a 'toxic' child become a reality when little Boo ends up in their world and the journey begins which changes everything. The story is filled with a host of characters uncovering the evil plans of Randell and how laughter instead can power the world.

Know the truth

Throughout the story, all monsters have been taught to be scared of children as they are toxic meaning if any contact is made they have to be decontaminated.

Have you ever believed something that has turned out to be a lie?

What would you say are the top 3 things that you believe as truth?

Doing what is right

Sully has the opportunity to return Boo a few times to the human world but some of the occasions who have not resulted in Boo being safe or in her actual home.

In your experience, is doing the right thing harder?

Can you share a time when you or someone you know has done the right thing even when they could have cheated or not bothered?

Imagination

Monsters Inc is a creative and colour filled movie filled with lots of great ideas.

If you could walk through a door that led you anywhere, where would you go and would you want to look like as a monster (have a go at drawing your character!)

Keeping memories

When Boo returns home, her door is shredded and a small piece is kept by Sully along with a drawing she did of them together.

How do you keep and remember your memories?

What is one of your best memories and what memories would you like to keep from your time in lockdown?
