

Let your light shine

How many carved pumpkins can you find?

Did you know

The largest pumpkin ever grown weighed 518kg!

We know this year has been pretty tough! With all the changes at school, not seeing friends and family and not being allowed to go trick or treating things might be feeling a little gloomy. But you can still let your light shine! You can make new memories with your family, think of things to be thankful for, find ways to show kindness and most importantly you can still have lots of fun.

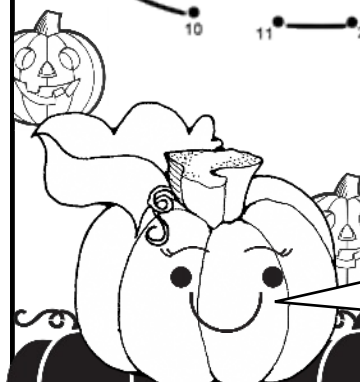

Prayer:

Thank you God for the light you have put inside me.
Please help me to find ways to keep letting it shine.
Amen.

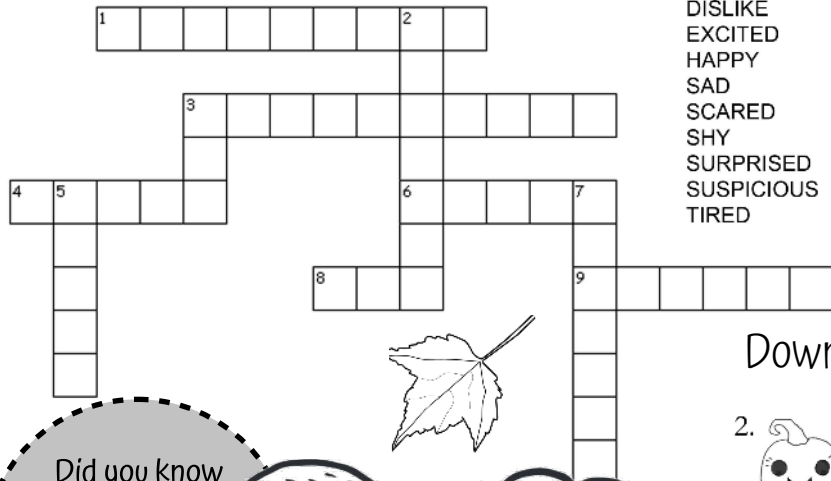

Did you know

The tradition of carving pumpkins started with the carving of turnips.

Can you spot all 5 differences between the two pictures?

Did you know
Antarctica is the only continent that pumpkins can't grow in.

Did you know
The standard colour of a pumpkin is orange, as we're sure you already know. But, you will sometimes come across yellow, green, red and even a ghostly white shade too!

Did you know
Pumpkins are actually a fruit. This is because they contain seeds, but they are often referred to as vegetables.

Find these words:
pumpkin leaf vine pick
carve pie orange seeds
